## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I**, claims 38-47, drawn to a **method of providing a pet with a benefit** relating to an effective assimilation of a lipid or lipid fraction comprising the steps of administering to the pet an edible composition comprising an intestinal mucosa function-promoter.

**Group II**, claims 48-60, drawn to a **nutrition management regimen** comprising a dietary component for feeding regularly, according to predetermined directions, to a pet animal, the dietary component comprising an intestinal mucosa function-promoter.

**Group III**, claims 61-65, drawn to a **pet food product** comprising an intestinal mucosa function-promoter.

**Group IV**, claims 66-71, drawn to a **method of manufacture of an edible composition** comprising an intestinal mucosa function-promoter.

2. The inventions listed as Groups I -III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature described in Claims 38, 48, 61, and 66, which is described as composition comprising an intestinal mucosa function-promoter

is either obvious or anticipated by Fuchs et al WO 02/15719 ('719).

3. '719 discloses a method of treatment which comprises administering an effective amount of the composition which contains an intestinal mucoas function promoter (whey protein) in an amount effective to maintain, improve or enhance the capacity of the pet to digest lipid (abstract, pg. 6 lines 5-10; pg. 12 lines 3-20 and claims 1-20).
4. Accordingly, the special technical feature linking Groups I, II, and III, (a composition comprising an intestinal mucosa function-promoter) does not provide a contribution over the prior art, and no single general inventive concept exists. Therefore, restriction is appropriate.
5. Due to the complexity of the action, the action was submitted in writing.
6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
